

Sterval in association with DreamTec are pleased to present SterKive, an independent software data archiving system, designed to interpret, record & archive all critical data essential for parametric release of processed loads from Autoclaves, Washer Disinfectors & Ultrasonic Units.

#### Features Include:

- Works independently of machine manufacturer using separate temperature and pressure sensors.
- Can be fitted to any make or model of machine
- Combines machine records and independent records in one user friendly platform.
- Electronic sign-off on cycle, technician/operator recorded with every cycle.
- Easy access and retrieval of cycle data.
- Removes the need for printers, paper, ink etc. with easy export of data, output to PDF, Excel, CSV etc.
- Graphed data view of cycle, zoom in and out of recorded values.
- Parametric markers highlighted on graphs.
- Real time analysis of data to mark cycle as **PASS** or **FAIL**.
